## WHAT FINNTRAIL WADING GEAR IS ALL ABOUT

FINNTRAIL has been developing and designing technological gear for ATV & UTV riders more than 10 years. Our team tests all products in natural conditions of water, mud and swamps in all weather conditions. Our gear and us challenge the harshest fords, the thickest mud and the most viscous swamps. Only after the gear has withstood these conditions does it leave our warehouses to help ATV & UTV riders from all over the world every day. Top riders have contributed to the testing and development of FINNTRAIL gear from this catalog. Join us!

We produce the highest quality ATV & UTV wading gear  
We are confident in its quality and reliability, that is why we provide a 1-year warranty

# OUR MISSION

FINNTRAIL develops powersports riding gear with 100% protection from water and mud. Our products perform at the highest level to enhance your off-road experience and help you make the most of your vehicle.

# OUR BRAND STORY

Our story began at the edge of the Earth between the woodlands of Norway and the Barents Sea in 2013. It was a time when off-road riders didn't have specialized apparel. Instead, they used to wear waders made for anglers and hunters, though they didn't and couldn't fit their needs. What worked for wading often fell short in extreme riding environments.

To fill the gap, two adventure enthusiasts started upgrading heavy, bulky and non-breathable fly fishing waders into something new that would encounter any off-road challenge. After a certain period of testing, a prototype of the world's first ATV waders was introduced to the community. Breathable lightweight materials, anatomical design, reinforcement in high stress areas - something that many passionate riders were craving.

Since the off-road industry has developed, so have we. In 2015, we introduced the high-performance waterproof FINNTRAIL SYSTEM: breathable stockingfoot waders + boots + jacket. This set performs the perfect balance of comfort and reliability. It is waterproof, breathable, lightweight, durable, and flexible - in a word, OFF-ROAD PROOF.

# WHAT IS SPECIALIZED ATV/UTV GEAR?

**IF YOU'RE GOING TO FISH AND AFRAID OF GETTING DIRTY, THEN YOU JUST CAN PICK SOME CLOTHES FROM THE NEAREST MALL. BUT IF YOU'RE REALLY READY TO BATTLE — WELCOME TO FINNTRAIL!**

**1 |**

Abrasion Resistance: common waders are puncture-proof only. Special ATV / UTV waders are also protected from abrasion, this kind of damage usually kills the gear in the OFF-ROAD.

**2 |**

Maximum level of protection of the most stressed gear areas while riding ATV / UTV: armored fabric on the inside of the legs, seat and knees.

**3 |**

Partial protection won't be enough for you, right? With FINNTRAIL you can fully equip yourself: a jacket, waders, boots, gloves and thermal underwear of which the FINNTRAIL RIDING SYSTEM consists.

**4 |**

Special hydrophobic dirt-repellent coating: water and dirt don't linger on our riders, thereby not disrupting the breathability of the membrane.

**5 |**

A wide line of functional gear: everyone can choose the item to suit their needs, from light waders for a hangout to reinforced ones for the most harsh rides.

**6 |**

Ride hard, look good - FINNTRAIL has not only a conservative design, but also a wide line of aggressive colors.

**7 |**

Articulated cut: the gear is made in such a way as the rider can comfortably sit for a long time.

**8 |**

Thin boots are easy to puncture when contacting wheels, sharp branches or stones. FINNTRAIL boots are made from the most durable materials and components designed especially for extreme using. Boots provide ankle support, protecting against dislocations and injuries.

**9 |**

The weakest point of waders is the seams; manufacturing technologies with a minimum number of seams are applied to the construction of FINNTRAIL waders.

**10 |**

The devil is in the details. We make gear for people who love extreme sports; such options as reflective elements, cut-in (not hinged) pockets, mounts for the walkie-talkie, a collar that does not interfere with the use of a helmet, and magnetic fasteners instead of Velcro ones make our gear adapted for the riders needs.

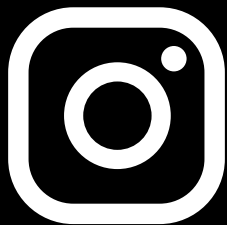

# ONE OF THE LARGEST OFF-ROAD COMMUNITIES

**98 000**  
subscribers

**55 000**  
subscribers

**USA - 60%   Canada - 30%   Europe - 10%**

**WE UNDERSTAND THE TRUE MEANING OF THE WORD «TEAM».  
THAT'S WHY WE PROVIDE FULL CYCLE SUPPORT FOR ALL OUR PARTNERS.**

## **CONSTANT ADVERTISING SUPPORT IN SOCIAL MEDIA**

Our social media business pages are a powerful platform for promoting and building a community around brand.

Our 150,000 subscribers are an excellent audience of potential customers with whom we share information about companies, shops and chain stores of our partners.

## **WIDE RANGE OF SIZES**

We have sizes for all genders, ages and body types. Including expanded size chart Long and King - MK, LK, LL, XLL and XLK. If something is wrong with the size or fit, we are always on your side. We will figure out the situation and solve the problem.

# WHAT THE EXPERTS THINK

## OSTACRUISER

World-famous ATV & UTV rider

I've been partnered with FINNTRAIL for over three years and I'm 100% satisfied with their gear! Personally, I've never used better wading gear than what these guys are producing! It is super comfortable, really durable, and keeps me and my crew dry! It's the best choice on the market.

## JP STEPHENS

Young Youtube star

Finntrail gear is the ultimate riding gear for atv mud riders. I don't feel that I'm even wearing waders while in Finntrail that's how lightweight and comfortable they are! Finntrail's style is very unique and modern, I think the wader suits resemble the look of a samurai's armor, especially with how the coats have a large tail to keep mud and water running down the gear.

## ROBIN JANSSON

CEO | Owner RJWC

Our FINNTRAIL gear keeps us dry and warm! Very thought out design of both the jacket waders and shoes. We also have their neoprene gloves and they are awesome. We ride a lot of muskeg here and it's very wet and cold conditions. FINNTRAIL does a great job! It keeps you dry and warm and you look cool while doing it. They are also easy to clean!

## KYLE MAINVILLE

Popular Youtube Creator

I've used several brands when it comes to off road gear and I am confident that nothing compares to Finntrail. Common big box store brands never fit and try to cover too many jobs. Finntrail's wader, boot and jacket combo was made to do the job and do it better than anyone else. Once you give their gear a shot it will become your new standard for what you expect off road gear to be like.

## ADRENALINE JUNKIE PROD

Team of Youtube vloggers

We test a lot of different gear, we ride a lot, and we ride hard. We ride in all weather conditions while we are out shooting YouTube videos and we really love our FINNTRAIL gear. It does great in mud, dirt, rain, or even snow. It's hands down the best wet weather riding gear you can get, we recommend it to everyone!

## CHRIS BLACK

Extreme ATV Offroad

Huge shout out to FINNTRAIL for making my life so much easier! I love this all season wading gear! Not one failed zipper. Not one puncture. Not one boot chafe. Zipping waders are fantastic! All I can say is thank you guys, for making this gear so comfy and durable.

# RIDE HARD, LOOK GOOD

Yeah, why not, if we can! Riding hard in safety and comfort, and looking good even while up to ears with mud and water is priceless. Impressive design, variety of colors and patterns and is another FINNTRAIL advantage for riders.

## WATERPROOF SYSTEM FOR PROPER WATER AND MUD RIDING

Inveterate riders are always surrounded by tons of water and mud that splashes everything around: from ATVs and themselves, and to people around.

Waterproof

Durable

Lightweight

Breathable

## THE CORE FINNTRAIL PRODUCT IS WADERS

Waders are a type of waterproof riding gear. They help you traverse chest deep water and withstand heavy rains or repeated splashes while remaining warm, dry and mobile. At FINNTRAIL, we use waterproof, breathable and durable fabrics utilizing Hard-Tex membrane technology. This makes our gear completely waterproof, yet breathable. It is durable and reliable even in the harshest conditions. All the high-wear areas, such as knees, buttocks, thighs and lower legs, are reinforced to be extra durable and puncture resistant. Aside from being tough, our waders look great and match our line of FINNTRAIL jackets, wading boots and thermal underwear. Combine our full line of outdoor gear for the ultimate level of protection, comfort, and style on the trail.

# WIDE RANGE OF WADERS

**WATERPROOF JACKETS  
AND WADING BOOTS**

**LAYERING AND ACCESSORIES**

# FINNTRAIL RIDING SYSTEM

1

## BASE LAYER

- Moisture removal and temperature regulation
- Thermal underwear

2

## MIDDLE LAYER

- Highly durable and warmth without weight
- Fast drying

3

## OUTTER LAYER

- Protection against water, mud and wind
- Reinforced breathable membrane fabric

# TECHNOLOGIES

## HARD-TEX<sup>™</sup> MEMBRANE

- Waterproof at a depth up to 1,5 m
- All seams are fully sealed
- Extra reinforcement and protection in the seat area

Hard-Tex<sup>®</sup> membrane is an incredibly strong thin material which offers breathable, waterproof and windproof properties. When applied in powersports gear, it allows riders to perform at their best, whilst staying dry and warm.

Hard-Tex<sup>®</sup> looks like a microporous film with over 1.2-1.4 billion tiny holes per square centimeter. These pores are smaller than raindrops and larger than vapor molecules. Due to this structure, Hard-Tex<sup>®</sup> membrane stops liquid water but allows vapor to pass through. This means Hard-Tex<sup>®</sup> keeps you dry from the water outside and lets excess moisture evaporate from the skin.

How to measure?

Waterproofness of a fabric is its resistance to water pressure. It is measured by placing a 1"x1" square tube over the fabric and determining how high a column of water you can suspend over it before it starts to leak. The result is typically recorded in millimeters. The higher the rating, the more waterproof the material.

High-performance waterproof fabrics are in the 15,000mm - 25,000mm range. These are totally waterproof garments which can withstand serious pressure at a depth up to 1.5m (5 ft) without leakage.

- High level of water resistance
- Mudproof throughout
- Allows membrane fabric to breathe

DWR is an ultra-thin Durable Water Repellent finish which is applied to the face fabric of garments. It lowers the surface tension of the material and makes the moisture “bead up” as a droplet and roll off the exterior before it can saturate the weave.

DWR is useful in 2 main cases. With waterproof & breathable outerwear, DWR finish performs as a “first line of defense” on membrane fabrics. It helps to prevent water saturating the surface and helps the fabric maintain its breathability.

With non-waterproof casual items, DWR finish is applied as a “just in case” extra protection when the weather changes in the course of a day. It makes the clothes a little more versatile and suitable for mild weather like a light rain or mist.

DWR is durable but not indefinite. Mud, abrasion and washing reduce its effectiveness over time. If water is no longer beading up on the surface of DWR-coated gear after a certain number of uses and washes, you can restore the DWR with spray-on treatments.

# TECHNOLOGIES

- Fully water- and windproof
- Easy to put on and take off
- Easy to clean and care

TIZIP® is a strong waterproof and mud-resistant zip closure for demanding use. Applied in powersports gear and accessories, it provides both 100% waterproofness and fast access.

TIZIP® zipper is made of a robust plastic coil zipper on a heavy duty fabric. It features extra strong plastic teeth which keep the sealing edges tightly sealed together when the zipper is closed. As the internal air pressure increases or when cross tension is applied, the seal tightens. It means that the zipper will survive short-term bending or twisting without separating.

Waterproofness is only half of the story, because TIZIP® is also highly resistant to damages caused by mud, debris or sand. It makes this zipper the best option for off-road riding in extreme conditions. For more durability, regular cleaning with soap and water is recommended.

- High level of water resistance
- Mud doesn't stick to fabric
- Allows membrane fabric to breathe

Teflon® coating is an extremely durable tissue treatment which offers the superior mechanical properties of a woven fabric such as water and dirt repellency, stain and oil protection. It doesn't impact the look, feel, color, or breathability of a fabric, but ensures its long-lasting performance in harsh environments.

Teflon® protector forms an invisible molecular barrier around each fiber. This barrier decreases the critical surface tension of a fabric and lets it repel liquids as well as release stains or mud. Any liquid, even oil-based, can be brushed off the fabric, as well as dust and dried mud can be removed with a simple cloth brush.

Teflon® coating makes the process of cleaning easier and extends the durability of riding gear. Since Teflon® is built in the fabric, it retains durability after many washing & cleaning cycles.

# TECHNOLOGIES

- Warmness comparable to goose down
- So warm yet light
- Keeps body heat but allows moisture to escape

An innovative Thermalrate® insulation technology introduces one of the lightest insulation for powersports riding gear. Warm, thin, and powerful, this material helps trap and hold body heat while allowing moisture to escape.

The Thermalrate® fabric is made of the unique synthetic microfibers which work by trapping air molecules between the body and the cold outside. Since these fibers are very fine, they trap more air in less space. The thickness of the fabric includes both weave and height and is expressed in grams per square meter (gsm).

The properties that make Thermalrate® an excellent choice for winter riding gear are its durability and high resistance to compression. Even when stress is applied to a material, it still retains those little air pockets so important for trapping heat.

When wet, Thermalrate® insulation retains warmth. It ensures low water absorption, so you will keep warm even in damp conditions.

- Warmth without weight
- Hypoallergenic
- Doesn't restrict movement

Polartec® fleece is a soft synthetic fabric made from polyester fibers that provides an excellent warmth-to-weight ratio. Initially made as an alternative to wool for more versatile durability, it is warm, comfortable and much lighter than natural textile fibers.

Polartec® has the unique surface structure which creates air pockets to trap air and retain body heat, delivering lightweight thermoregulation with optimal breathability. It's a go-to choice for a thin and effective insulation layer in outdoor and off-road riding gear.

Polartec® is hydrophobic, holding less than 1% of its weight in water. It retains much of its insulating properties even when wet. Being durable and fast-drying, it's perfect for dynamic or static outdoor activities in mild and cold weather.

# TECHNOLOGIES

## HARD-TEX® MEMBRANE

Hard-Tex® membrane is a waterproof breathable membrane fabric. It looks like a microporous material with over 1.2-1.4 billion tiny holes per square centimeter. These pores are smaller than raindrops and larger than vapor molecules. Due to this structure, Hard-Tex® membrane stops liquid water but allows vapor to pass through. This means Hard-Tex® keeps you dry from the water outside and lets excess moisture evaporate from the skin.

## TEFLON® COATING

Teflon® coating is an extremely durable non-stick tissue treatment which forms an invisible protection around the fibers, providing their mud resistance. Any liquid, even oil-based, can be brushed off the fabric, as well as dust and dried mud can be removed with a simple cloth brush. Teflon® coating makes the process of cleaning easier and extends the durability of riding gear.

## TIZIP® ZIPPER

TIZIP® zipper is absolutely waterproof, strong, and suitable for demanding use. It provides both 100% water protection and fast access. TIZIP® zipper is highly resistant to damages caused by dirt and mud. It is also airtight, which means the seal is designed to tighten as the internal air pressure increases.

## 3M™ REFLECTIVE ELEMENTS

Durable reflective elements are made by 3M™ Company from a material which reflects a large amount of light directly back toward its source. All garments with 3M™ reflective elements provide enhanced visibility of a rider, improving his safety, especially at nighttime, dawn, and dusk.

## POLARTEC® FABRIC

Polartec Thermal Pro fleece is the most advanced performance material of the Polartec® insulation fabrics. Its unique surface structure creates air pockets to trap air and retain body heat, delivering excellent lightweight warmth. Since Thermal Pro is also breathable, fast-drying, and durable, it's perfect for dynamic or static outdoor activities in mild and cold weather.

## THINSULATE™ INSULATION

Thinsulate™ is an innovative synthetic material which is created to be more effective than natural down due to the increased density of fibers with decreased size of fibers. The gaps between fibers not only retain some of the heat produced by the body, but also allow moisture to escape. Thinsulate™ retains its insulating properties when wet and performs great in any environment.

## THERMALRATE® INSULATION

An innovative Thermalrate® insulation technology introduces the best warmth-to-weight ratio. Thermalrate® is a go-to choice for a thin and effective insulation layer in high-performance gear. It offers great insulation properties in a smaller package and low water absorption to perform great in wet conditions.

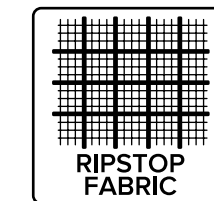

## CORDURA® REINFORCEMENT

Cordura® is a heavy-duty material which has been developed to reinforce other fabrics for greater abrasion and tear resistance. When reinforced with Cordura® in key stress areas, riding gear becomes more durable and helps riders avoid cuts or gravel rash in the toughest environments.

## HIPORA® MEMBRANE

Hipora® is a 3-layer membrane fabric with a polyurethane coating that prevents water from entering but lets moisture out. It has a microporous structure with tiny holes in it, so water droplets won't get inside the gear, but excess vapor can expel. Your body does not get sweaty while you stay dry and warm.

## RIPSTOP FABRIC

Ripstop is a thin, lightweight and waterproof fabric which resists tearing and ripping due to a special reinforcing technique. During the weaving process, thicker threads are interwoven in a crosshatch pattern. With this structure, small tears can not easily spread across the fabric. It makes the finished gear more durable with the excellent strength-to-weight ratio.

## DWR

DWR is an ultra-thin Durable Water Repellent finish which is applied to the outer layer of a membrane fabric. It lowers the surface tension of the material and makes water disperse rather than saturate. DWR is usually used with waterproof membrane multi-layer fabrics such as Hard-Tex® to additionally protect outer layers against water penetration.

## YKK FASTENING

YKK fastening products set the industry standards for function, quality, and design. The extra strong YKK plastic hardware provides a smooth and easy release in high-performance riding gear. In Finntrail waders, suspenders come with opposing YKK buckles for waist-high conversion and easy put on/off performance.

## F.I.L.L.®

F.I.L.L.® technology is used in riding gear to ensure additional flotation assistance in emergency cases. This is a special highly buoyant mid-layer applied in the basic fabric. If a rider breaks through the ice and falls into the water, F.I.L.L.® technology helps to stay on the surface, keeping the head above the water for a certain period of time. NOTE! This is not a survival vest or other flotation devices.

# WADERS

## WADERS

Waders are a type of a bib & brace overall made of a durable membrane fabric, which allows you to cross water obstacles up to 1,5 m (5 ft) deep as remaining dry and comfortable.

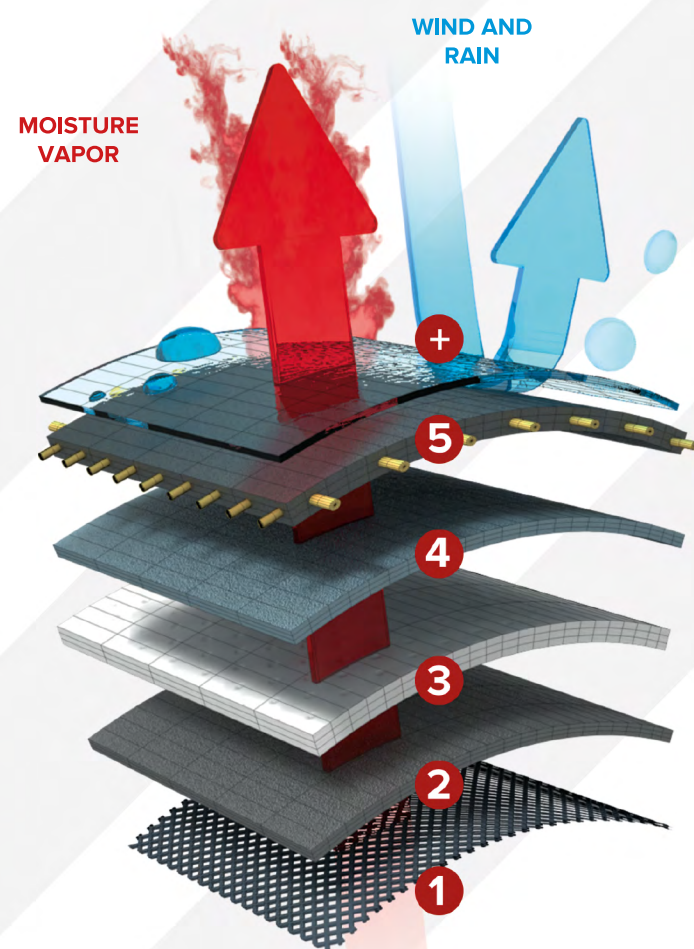

## FIVE-LAYER FABRIC OF FINNTRAIL WADERS

Taking on the roughest trails is a blast, but the clean-up that follows? Not so much. Ordinary waterproof clothing doesn't always get the job done.

Lucky for you, Finntrail gear is far from ordinary. Its durable, breathable, material provides protection from mud and sharp branches without compromising mobility, ensuring maximum comfort while riding.

## SPEEDMASTER-ZIP 1529

### STOCKINGFOOT WADERS

The most advanced model of waders for the most extreme conditions. The model got all technological solutions for your convenience and maximum level of protection while driving.

**SIZE** S - XXL, LL, LK, XLK, XXLK  
Expanded size chart Long and King  
**COLOR** Graphite, CamoArmy

## SPEEDMASTER 1528

### STOCKINGFOOT WADERS

Modern model of waders designed for those who look for the most hard trail and muddy puddles. High level of protection and maximum convenience for active riding.

**SIZE** S - XXL, ML, LL, XLL  
Expanded size chart Long and King  
**COLOR** CamoArctic (NEW), CamoArmy

**WATERPROOF** 25 000 mm  
**BREATHABLE FABRIC** 7000g/m<sup>2</sup>/24h

- Five-layer fabric with a HARD-TEX® membrane
- All seams and zippers are reliably glued
- Reinforced inner leg areas, knees and seat
- Waterproof TIZIP® zipper
- Mud-resistant Teflon™ Coating
- Ergonomic knee cut
- Built-in removable shin/knee pads
- Elastic suspenders and a belt with a YKK buckle
- Two outside water resistant chest pockets with a strong zipper
- Two additional inside chest pockets for smartphone
- Drying loops
- Built-in comfortable 0.16 inches (4mm) neoprene socks with a reinforced sole
- 3M reflective elements
- Waterproof smartphone pouch is included

**WATERPROOF** 25 000 mm

## WHAT ARE WADING BOOTS

For the maximum level of comfort, your safety during extreme riding, and to prevent gear damage, special shoes are simply necessary. FINNTRAIL wading boots provide maximum protection for your ankle with the comfort level of tracking boots. When manufacturing boots, we take into account the anatomical features and the harsh conditions that you will encounter during off-road ridings.

# BOOTS

## SPEEDMASTER 5228 NEW

### WADING BOOTS

Top notch wading boots with the highest level of comfort, endurance and protection riders's feet. Unique sole protector protects foot against puncture and prevents sticking mud and sand.

- Synthetic leather and a damage-resistant durable fabric

Sturdy, comfortable boots for hardcore off-roaders. Made of 5 mm neoprene and with a special lining that prevents condensation. Unique design of the bottom of the boots provide good ankle support.

- Anti-condensation lining
- Convenient wide loop at the back for a comfortable fit
- Versatile rough terrain tread

**COLOR** Red, Khaki, Yellow  
**SIZE** 7 - 13

# RUBBER BOOTS

## WHAT IS A WADING JACKET

A wading jacket is made of a breathable membrane fabric. It is shorter than a regular jacket, has no lining, and is equipped with spacious chest-level pockets. Wearing a different type of a jacket can cause issues when you step into the water due to lining and pockets getting wet, letting water inside. A wading jacket use mud-resistant zippers and magnetic clasps instead of Velcro.

# HOW DOES IT WORK

**DURABLE  
FOUR-LAYER  
FABRIC WITH  
A HARD-TEX  
MEMBRANE**

**FINNTRAIL GEAR:  
MADE ESPECIALLY  
FOR RIDERS**

## CHEST SLIP POCKETS

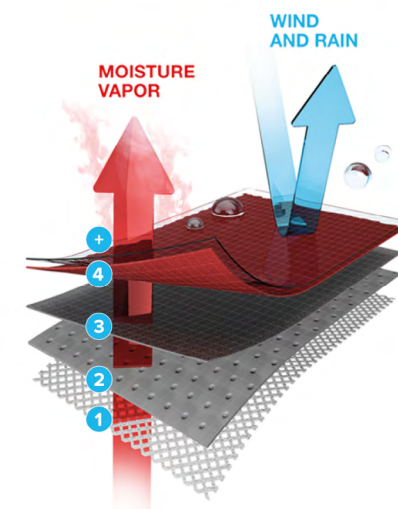

## MAGNETIC FLAP

## WATERPROOF WRIST CUFFS

## DURABLE FOUR-LAYER FABRIC WITH A HARD-TEX MEMBRANE

- + DWR Coating
- 4 Outer Material
- 3 Protective Layer
- 2 HARD-TEX Membrane
- 1 Inner Lining

# JACKETS

## SPEEDMASTER 4026 UPGRADE JACKET

A new advanced waterproof jacket tailored for extreme conditions boasts the upper level of water and mud protection. And tight-fitting neoprene wrist cuffs with taped seams prevent direct ingress of water.

NEW COLOR

# BRIGHT SPOT ON THE TRAIL

Like all quad lovers, we are crazy about visual tuning. We love how a new or freshly washed ATV looks.

In the design of Finntrail gear, we always have tried to highlight the bright colors and individual details of your vehicles.

And we do it for your feeling of beauty, additional unity with your machine, and for the perfect photos on social networks, of course.

## SUITS

There are some rides on which you do not have mud puddles and deep fords to cross. Sometimes it's a pleasure to pack light for a ride. Finntrail suits are what you need for it! You'll get the same level of quality, sufficient level of protection against moisture and rain, while staying light and highly mobile.

# SUITS

## THOR 3420

### SUIT

The suit is designed for light travel without overcoming deep fords and mud pits. The suit consists of two parts — bibs with high warm back with suspenders that can be adjusted in length and a jacket.

## THERMAL LAYERS

### THERMAL CLOTHING FOR ALL SEASONS

The first layer of gear is just as important as external, main. The quality of your thermal clothing affects how long and comfortable you will ride, at any season. Therefore, in the production of thermal underwear, we first of all make sure that it performs its functions 100% and at the same time remains invisible during use.

# THERMAL LAYERS

## NITRO 1320

### SOFTSHELL JACKET

This windproof water-repellent jacket will cope with light rain and will not be distracted from your favorite activity. Comfortable jacket suitable for everyday wear and as an insulating layer in the cold season.

## MASTER 1503

### THERMAL JACKET

Lightweight Master jacket features smart THERMALRATE® insulation, which offers the same insulation qualities as goose down. It can be used both as an extra insulating layer for ATV & UTV riding and a jacket for everyday wear. The moisture-resistant coating protects against light rain and wind. Recommended to wear with All Season, Thermo S, or Subzero thermal underwear.

**WATERPROOF** 3 000 mm

- Secure locks and elasticated drawstring for wearing

**DIMENSIONS** Length 27 cm (10.6 inch), width 17 cm (6.7 inch).

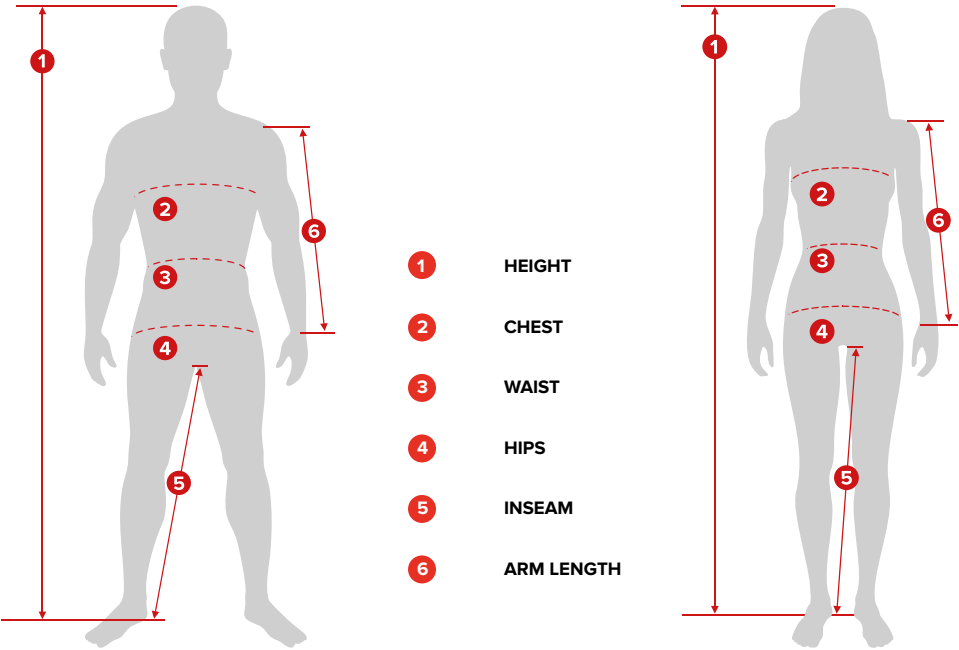

# SIZING CHART

## HOW TO CHOOSE THE PERFECT SIZE WADER

Measure your waist circumference at the narrowest part and measure your hips at the fullest part, standing with your feet together. Choose the largest measurement and refer to the size chart. If you are looking for ATV waders, add from 0.8 to 1.2 inches to your inseam measurement.

## HOW TO CHOOSE YOUR JACKET, SUIT AND OR THERMAL UNDERWEAR SIZE

A jacket size and a thermal underwear size is equivalent to your real clothing size.

	cm	76-79	82-84
5	Inseam		
	inches	24"-26"	28"-31"
	cm	62-66	72-78

### HOW TO CHOOSE YOUR WADING BOOTS SIZE

Place a piece of paper on the floor and sit down in a chair with your foot resting on the piece of paper. Trace the outline of your foot. Measure the length of the foot from the heel to the tip of the big toe in inches. Refer to the size chart. If you use neoprene or double layered thermal socks, add 0.20 inches.

Canada/USA	6	7	8	9	10	11	12	13	14

cm	24	25	26	27	28	29	30	31	32

### HOW TO CHOOSE YOUR GLOVES SIZE

Measure the hand you normally write with at its widest point in inches (excluding the thumb). Refer to the size chart.
